EARLY JOINING POLICY

1. Companies may indicate early joining in their offer letters. Such cases will be reported to director placement and Dean.
2. At present the University does not have an explicit policy for early joining as the University does not encourage early joining because it involves the loss of academic credits.
3. The University will only allow the students to join early if recommended by the Placement Head and Honorable Vice Chancellor.
4. If a student is allowed to join early, then he/she would have to give an undertaking whereby he/she would diligently undertake the assignments given to him/her and report to the concerned faculty member on the mutually agreed days. Failure in submitting the assignments and meeting the faculty members on the assigned days may result in the withholding of the degree.
5. The student must manage the leave of absence from the company, to write the final examinations and complete the other academic requirements in time.
6. The University will be taking the performance report of the students from the respective companies time to time.
