# Transform Your Personality & Augment Power Skills For Career Success

10 June - 10 July 2024 | Anyone Can Register

## Overview

Investment on personality transformation and Soft Skills upgradation becomes essential when it comes to career growth and progression. With growing technological advancements and the rapid development of AI, job markets across the world are going to change. Automation of various job roles would replace individuals yet there is a silver lining to this. To be successful in a workplace and effectively carry out tasks, requires exceptional Soft Skills that complement the Hard Skills. ["https://indianschoolofimage.com/2021/07/29/6-reasons-why-soft-skills-training-is-essential/"](https://indianschoolofimage.com/2021/07/29/6-reasons-why-soft-skills-training-is-essential/)

The significance of Soft Skills has increased today given that machines and AI cannot possess traits like empathy, emotional intelligence as well as effective communication skills that are required in a workplace. According to the research conducted by Deakin University, Soft Skills intensive jobs would make up to 63% of overall jobs by 2030.
